6 In 1 Reader

The Ultimate Universal Digital Media Reader

As digital technology continues to expand in today's market, there will be more and more devices utilizing digital media. Digital cameras, MP3 players, mobile phones and PDAs all now use either CompactFlash, IBM Microdrive, SmartMedia, SD Card, MultiMediaCard, or Memory Stick media. With the Dazzle 6 In 1 Reader, you can read them all.

The compact, dual slot design allows the CompactFlash or IBM Microdrive to work concurrently with the SmartMedia, SD Card, MultiMediaCard, or Memory Stick. As a stand-alone reader, this offers an alternative to the cumbersome process of connecting the digital data devices directly to the PC or Mac, which uses up battery life.

Key Features

The Reader for all Digital Data Devices

The Dazzle 6 in 1 Reader works with all digital data devices such as digital cameras, PDA's, MP3 players, and cell phones, which use CompactFlash, IBM Microdrive, SmartMedia, SD Card, MultiMediaCard, and Memory Stick media.

AMAT Technology

Dazzle 6 in 1 Reader will work with *Any Media Any Time*. Because this reader is upgradeable and works with all removable digital media, this is the last reader you will ever need to buy.

Create Slideshows for DVD

Dazzle OnDVD software allows users of digital devices to organize their digital pictures into a slide show, burn to a CD and view on a DVD Player. (PC only)

Transfer Data Directly From One Media to Another

Because the CompactFlash / IBM Microdrive is concurrent with SmartMedia, SD Card, MultiMediaCard, or Memory Stick, you can transfer files directly from one media to another.

Upload / Download up to 50x Faster

Dazzle 6 in 1 Reader makes it easy to transfer data between your PC and your digital camera, MP3 player, PDA, or any other portable device in less time, while saving the battery life of the digital device.

Use With Any Storage Device

Data collected on digital media cards can be instantly transferred to a computer without even having the device present!
