

PINNACLE EXPRESS DV

Birthday parties. Ball games. Weddings. You've videotaped them all. Now what? With Pinnacle Express DV, sharing your videos is as easy and fun as it was to make them. In a few easy steps, you'll be able to capture your memories from your DV camcorder or VCR to create a truly professional looking video production, complete with dynamic menus and titles, that you can play on your home DVD player.

Capture Your Inspiration

Converting your videos to DVD couldn't be easier. Simply install the included 1394/FireWire® card, and connect your DV camcorder or VCR. Fire up Pinnacle Express DV and you're ready to go! With its built in Scene Detection, Pinnacle Express DV automatically generates a scene index so you can instantly go to any spot in your video — no more rewind or fast-forward! Pinnacle Express DV also allows you to import videos as DV format AVI files, so you can quickly and easily burn DVD compatible discs of all the movies you've already created on your PC.

Prepare Your Masterpiece

Once your video has been captured, you have a choice. You can instantly create a CD to watch in your DVD player, or you can personalize your project by adding incredible special effects. Pinnacle Express DV allows you to add all the fades, titles, music and professional looking scene menus you need to transform your home movies into full blown Hollywood productions.

Premier Your Work

Once you've captured your video and added all of your titles and menus, you're ready to burn! Pinnacle Express DV allows you to preview your work and then use your PC's CD or DVD recorder to create a disc that you can play in your set top DVD player.

Pinnacle Express DV. Everything you need except the ticket window.

PINNACLE EXPRESS DV

Capture, Edit, Burn - All-In-One DVD Creation Doesn't Get Any Easier!

Capture Video

Capture video from your DV or Digital8 camcorder with included DV/FireWire® capture card. You may even import AVI files. Chapters and button thumbnails are automatically created using Pinnacle Express DV's Automatic Scene Detection.

Customize The Disc

Select from a number of pre-made menu templates or customize your own. Pinnacle Express DV also gives you the ability to re-order, split, and combine clips.

Create A Disc

Burn your project to DVD, Video CD (VCD), or Super Video CD (SVCD). Play back your title on your set-top DVD player!
